

FNR

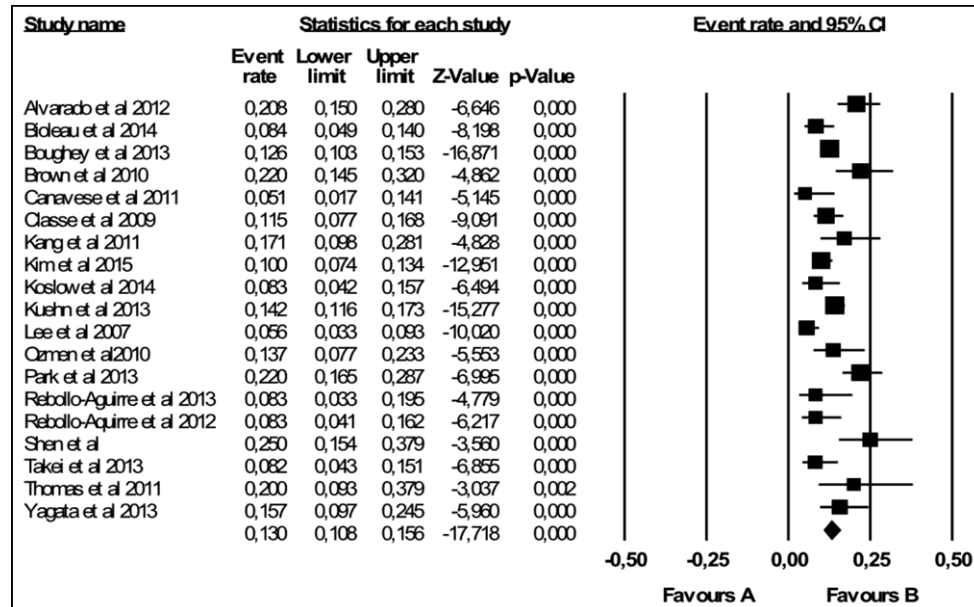

Figure 2 Forest plot showing event rate defined as FNR. Nineteen studies were included. The pooled estimate was found to be 13% (95% CI 10.8% to 15.6%).

Figure 3 Meta-analysis of FNR: a funnel plot to examine for evidence of publication bias. According to the funnel plot of logit FNR vs standard, there seems to be no publication bias with respect to the list of 19 studies reporting FNR.

IR

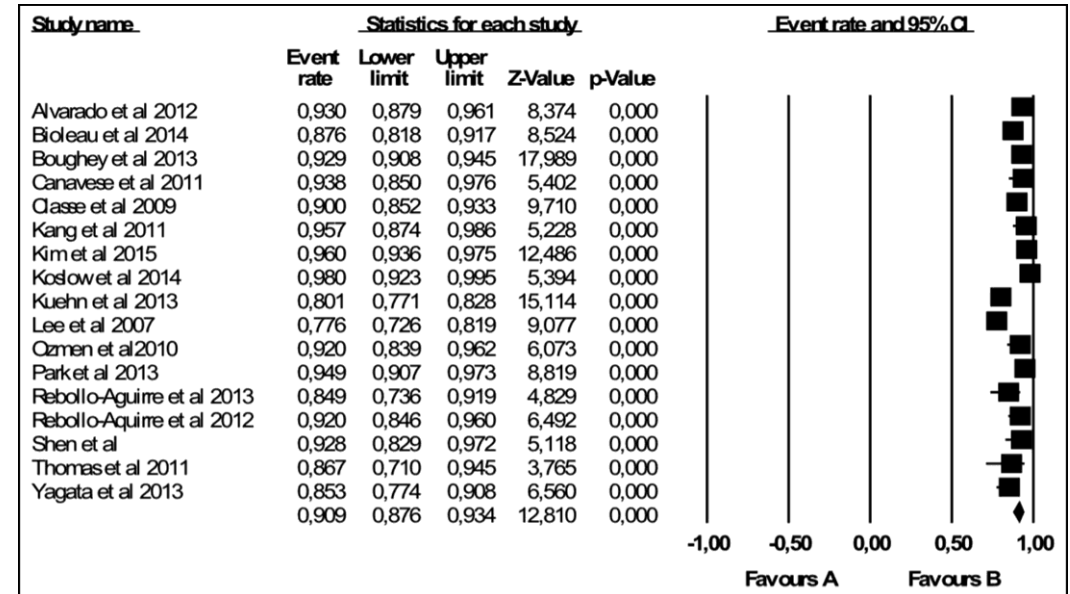

Figure 4 Forest plot showing event rate defined as IR. Seventeen studies were included. The pooled estimate was found to be 90.9% (95% CI 87.6% to 93.4%).

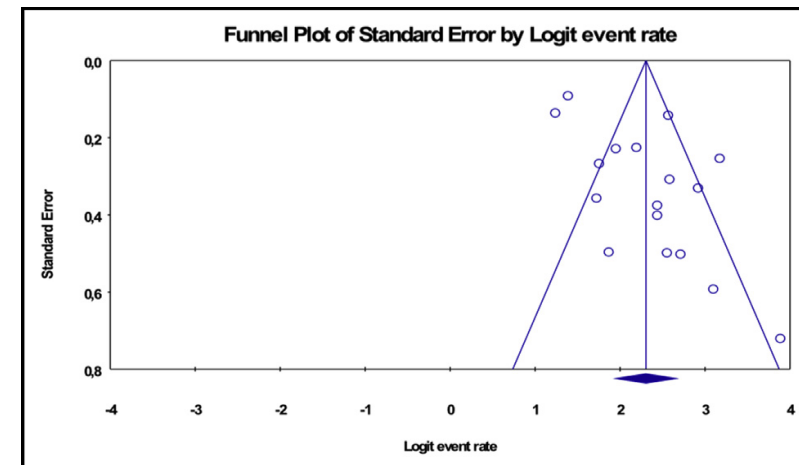

Figure 5 Meta-analysis of IR: a funnel plot of the included studies, estimated based on random effects analysis is relatively balanced, favoring the conclusion that there is no publication bias.
